DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

This house is located several hundred feet north of old Route 64 in Chewsville, Md. It is situated on a rise of ground toward the west end of the village and faces south.

The structure is a two-story, five-bay brick and frame dwelling, painted white. The walls are set on low limestone foundations. The west or brick section of the house displays all stretcher bond with siding apparent within the gable. The weather-boarded section of the house is sheathed with coved board siding.

The windows have narrow framing with modern six-light upper sashes over large single-pane lower sashes. Openings in the east section are trimmed with turn-of-the-century period architraves. A two-bay gable roofed dormer extends from the south slope of the roof.

Two entrances are present in the front elevation, in the second and fourth bays from the west end of the house. Both are framed similarly to the windows, neither including a transom.

The roof is covered with slate and extends beyond the end walls of the house. The eaves are finished with simple boxing. Small brick chimneys with several courses of corbeling are located inside each gable end and at the interior at the junction of the two sections.

A low roofed one-story porch supported by square posts extends along the front elevation.

The house is in excellent condition and stands on a tract containing .325 acre.

STATEMENT OF SIGNIFICANCE

The area of significance of this house is its architecture. Its appearance reflects vernacular building trends of the late 19th and early 20th centuries. Further study may reveal that this structure is an older building which has been refurbished.
